- 150 RPM (Standard)
- 1/2 HP motor
- Gearbox handles 300' - 400'
- 210 pounds with 100' of 11/16"

Slide the automatic feed out by pulling down on the ring pin.
Feed cable through the revolving arm.

Insert the cable through the automatic feed.
Place the revolving arm into the autofeed, pull down on the ring pin and slide the autofeed towards the reel so the revolving arm fits into the reel unit.
Make sure the ring pin snaps into place.

Slide drive spring onto the drive arm.

Finished setup.
